Date. **28th June, 2024**.....

Message

It has come to our knowledge that ISHRAE (Indian Society of Heating Refrigerating and Air Conditioning Engineers) is going to organise the 7th edition of REFCOLD INDIA 2024 at Kolkata on 03-05th of October, 2024.

REFCOLD India is an initiative of ISHRAE, which has been actively working towards expanding the refrigeration and cold chain industry with an objective to bringing forward the best technological solutions and increasing the overall growth of this sector.

The Cold Storages are the mainstay for maintaining food security and price stabilization of the Agricultural commodities. Apart from ensuring earning security for the farming community, it also generates a large number of direct and indirect employment opportunities.

Our member Cold Storages have been getting valuable inputs on the Cold Storage, Cold Rooms, Refer Vans, Pack Houses and Food Processing technologies through the REFCOLD event. The members also get to know on latest trends, innovations, challenges and opportunities for development of sustainable Cold Chain Industry. The exhibition would provide opportunity for attendees to connect with fellow Cold Chain industry players in the State including potential clients, investors for establishing effective linkages and networking.

This event also leads to many new tie-ups and business collaboration with the stakeholders, thereby opening up opportunities for expanding and strengthening their businesses in the post harvest and cold chain sector.

Being an active player of the Cold Chain community, I extend my heartiest congratulations for organising REFCOLD India 2024 and my best wishes for all the success of the event.

President, OCSA
